

♥ Day 7 Python Mission

Hi Lovely (my sweet Laddoo),

I'm so happy you're continuing this journey one day at a time. Every small program you write is helping your brain think like a programmer.

Today we'll revise everything you've learned and add just one tiny new idea: the comparison operators `>` and `<`. That's all—just one small step!

□ Python Missions

1. Print your name and your favorite movie.
2. Create variables: fruit, price, city. Print them.
3. Ask the user for two numbers and print their sum.
4. Print the result of `8 > 5`.
5. Print the result of `3 < 7`.
6. Create `age = 20`. Use `if...else` to print Adult if `age >= 18`, otherwise Minor.
7. Create `temp = 35`. Print Hot if `temp > 30`, otherwise Pleasant.
8. Print numbers from 1 to 5 using a for loop.
9. Print □ five times using a loop.
10. Print: See you tomorrow for Day 8! ♥

You're becoming stronger with every day's practice. Keep smiling, keep learning, and never be afraid of mistakes—they're proof that you're growing.

With lots of love,

Your biggest supporter ♥
