

♥ Day 10 Python Mission

Hi Lovely (my sweet Laddoo),

Today is a special milestone—Day 10! I'm really proud of you for staying consistent. Every day you practice, your confidence grows, even if it doesn't always feel that way.

You've already learned printing, variables, input, if...else, loops, and comparison operators. Today we'll add just one tiny new concept: `>=` (greater than or equal to). It checks if a value is greater than or exactly equal to another value.

□ Python Missions

1. Print your favorite movie.
2. Create variables: pet, age, place. Print them.
3. Ask the user for their favorite color and print it.
4. Print the result of `10 >= 10`.
5. Print the result of `7 >= 9`.
6. Create marks = 40. Use if...else to print "Pass" if marks `>= 35`, otherwise "Fail".
7. Create score = 90. Print "Excellent" if score `>= 90`, otherwise "Keep Practicing".
8. Print numbers from 2 to 6 using a for loop.
9. Print "I love Python!" two times using a loop.
10. Print: "See you tomorrow for Day 11!" ♥

Ten days of learning is something to celebrate. Keep taking one small step every day, and you'll be surprised how far you'll go. I'm always cheering for you. ♥

With lots of love,

Your biggest supporter ♥
