

♥ Day 5 Python Mission

Hi Lovely (my sweet Laddoo),

You're doing an amazing job staying consistent. Every small program you write makes you a little more confident. Don't worry about mistakes—they're part of learning.

Today we'll revise what you've learned and add just one tiny new idea: using a simple if...else statement.

☐ Python Missions

1. Print your name and your favorite food.
2. Create variables: name, city, age. Print them.
3. Ask the user for two numbers and print their sum.
4. Ask the user for their favorite fruit and print: I like ___ too!
5. Create marks = 42. Use if...else to print Pass if marks $\geq$ 35, otherwise Fail.
6. Ask the user for their age. Use if...else to print Adult if age $\geq$ 18, otherwise Minor.
7. Print numbers from 1 to 5 using a for loop.
8. Print ♥ five times using a loop.
9. Check whether $20 > 15$ and print the result.
10. Print: See you tomorrow for Day 6! ♥

Keep believing in yourself. Every day you practice, you're becoming a better programmer. I'm proud of your dedication! ☐

With lots of love,
Your biggest supporter ♥
