

## ♥ Day 6 Python Mission

Hi Lovely (my sweet Laddoo),

You're doing something really special by showing up every day. Even 20 minutes of practice is building a strong foundation.

Yesterday you learned if...else. Today we'll keep revising everything and learn just one tiny new thing: comparison operators (==, !=). Don't worry—they're very easy!

### □ Python Missions

1. Print your name and your favorite color.
2. Create variables: name, age, city. Print them.
3. Ask the user for two numbers and print their sum.
4. Check whether `10 == 10` and print the result.
5. Check whether `10 != 5` and print the result.
6. Create `marks = 80`. Use if...else to print Pass if `marks >= 35`, otherwise Fail.
7. Ask the user for their age. Print Adult if `age >= 18`, otherwise Minor.
8. Print numbers from 1 to 5 using a for loop.
9. Print □ five times using a loop.
10. Print: See you tomorrow for Day 7! ♥

Keep believing in yourself. Every little step matters, and I'm really proud of your consistency.

With lots of love,

Your biggest supporter ♥
